GOVERNMENT PUBLICATIONS.

1. **Government Publications** (with the exceptions mentioned in paragraphs 2 to 6) can be bought, either directly or through any bookseller, from—
 WYMAN AND SONS, LTD., Fetter Lane, London, E.C. ; or
 OLIVER AND BOYD, Tweeddale Court, Edinburgh ; or
 E. POSSONBY, LTD., 116, Grafton Street, Dublin.
 Booksellers, and the accredited agents of Free Public Libraries, are entitled to a discount of 25 per cent. from published prices.
 2. **Hydrographical Publications of the Admiralty** are sold by—
 J. D. POTTER, 145, Minories, London E.C.
 3. **Patent Office Publications** are sold at—
 The Patent Office, 25, Southampton Buildings, Chancery Lane, London, W.C.
 (N.B.—Classified Abridgments of Patent Specifications are sold also by Wyman and Sons, LTD.)
 4. **Ordnance Survey and Geological Survey Publications** can be purchased from—
 The Director General of the Ordnance Survey, Southampton ; or
 The Superintendent, Ordnance Survey, Dublin ; or
 Agents in most of the chief towns in the United Kingdom.
 (N.B.—Small Scale Maps are, as a rule, procurable at Railway Bookstalls in England and Wales.)
 5. **The Journal of the Board of Agriculture** is published monthly by the Board at 4 Whitehall Place, London, S.W. Price 4d.
 6. **The London Gazette** is published on Tuesday and Friday evenings by Wyman and Sons, LTD. Price 1s.
-

The following is a list of some of the more important Parliamentary and Official Publications recently issued:—

Statutes—

<i>Public General Acts, Local and Personal Acts, 1912.</i> In separate Acts, at varying prices.	
<i>Public General, Session 1910.</i> With Index, Tables, &c. Cloth.	3s.
<i>Second Revised Edition, 1235-1900.</i> Vols. I. to XX.	7s. 6d. each
<i>Statutes in Force. Chronological Table and Index of.</i> 27th Edition. To the end of the Session 1 and 2 Geo. V. (1911). 2 vols.	10s. 6d.
<i>Interregnum, 1642-1660. Acts and Ordinances of the.</i> In 3 vols (not sold separately).	10s.
<i>Acts of the Parliaments of Scotland, 1424-1707. Revised Edition.</i>	10s.
<i>Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character. Issued in 1890 to 1911.</i>	10s. each.
<i>Statutory Rules and Orders revised, in force on Dec. 31, 1908.</i> Vols. I. to XIII.	10s. each.
<i>Statutory Rules and Orders in force on 31st December, 1909. Index to.</i>	10s.

PARLIAMENTARY PAPER. House of Lords and House of Commons; each daily part 3d.; also issued in bound volumes with Index.

MINUTES OF PROCEEDINGS OF THE HOUSE OF LORDS.	1d. per 4 pp. Subscription, Session 1912, 3s.
VOICES AND PROCEEDINGS OF THE HOUSE OF COMMONS.	1d. per 8 pp. Subscription, Session 1912, 3s.
HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue.	
STATISTICAL ABSTRACT, UNITED KINGDOM. Years 1896 to 1910. [Cd. 5841.]	1s. 6d.
COLONIAL IMPORT DUTIES. 1910. [Cd. 5926.]	3s.
GOVERNMENT OF IRELAND BILL. No. 136.	3s.
Do. do. Financial Provisions. [Cd. 6154.]	1d.
AGRICULTURAL STATISTICS, GREAT BRITAIN. 1911. Acreage and Live Stock: Produce of Crops. [Cd. 6021, 6056.]	10s.
IMPERIAL INSTITUTE. Reports on Rubber and Gutta Percha. [Cd. 6022.]	1d.
AGRICULTURAL EDUCATION AND RESEARCH. Report on the Distribution of Grants, 1910-11. [Cd. 6025.]	3s.
CO-OPERATIVE SOCIETIES, INDUSTRIAL AND AGRICULTURAL, UNITED KINGDOM. Report with Statistical Tables. [Cd. 6045.]	1s. 6d.
STANDARD TIME RATES OF WAGES, UNITED KINGDOM. 1 January, 1912. [Cd. 6054.]	6d.
STRIKES AND LOCK-OUTS. Laws in British Dominions and Foreign Countries relating to Public Utility Services. [Cd. 6081.]	1s. 6d.
STATISTICAL ABSTRACT FOR THE BRITISH EMPIRE, 1896-1911. [Cd. 6082.]	1s. 6d.
FORESTRY IN SCOTLAND. Report of Committee, with Evidence, &c. [Cd. 6083.]	1s. 6d.
SHIFTING CASUALTIES, 1910-11. [Cd. 6093.]	1s. 6d.

AGRICULTURAL STATISTICS, IRELAND, 1911.

**RETURN OF PRICES OF CROPS, LIVE STOCK
AND OTHER IRISH AGRICULTURAL
PRODUCTS.**

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICUL-
TURE AND TECHNICAL INSTRUCTION FOR
IRELAND.

Sir,

I have the honour to submit the following Report on the prices in Ireland of Irish live stock and other agricultural produce for the year ended 31st December, 1911. Tables are submitted with the Report, showing the average prices for the twenty years, 1892-1911, while the quarterly average prices during 1911 are also set forth in separate tables.

The collection of this series of prices was first systematically undertaken by the Irish Land Commission in the year 1887, at which time also a record of prices from the year 1881 was compiled. The work of collecting and publishing these statistics of agricultural prices was subsequently transferred to this Department by the Agricultural and Technical Instruction (Ireland) Act, 1899. Accordingly a continuous official record of Prices obtained in Ireland for Irish Live Stock and other Agricultural Produce is available for each year since and including 1881. Unofficial records of these prices were kept and published for years prior to 1881, and in Appendices II. and III. (pp. 88-95) of the Department's Return of Prices for the year 1906-7 some of the prices in these records were brought together in a manner convenient for reference. These unofficial prices were republished in the Returns of Prices for the years 1907-8, 1908-9, and 1910, but are omitted from the present Report.

The Returns from which this Report is compiled are of two kinds and are furnished from two different sources—

- (1) Returns of Prices of Fat and Store Cattle, Sheep, and Pigs.
- (2) Returns of Prices of Crops and Other Agricultural Produce.

For the purpose of Returns of Prices of Live Stock Ireland, outside Duhlin, is divided into twenty-four districts, to each of which a fair reporter has been appointed by the Department. All these reporters are

expert judges of live stock, and each is required to report upon the more important fairs in his district, a list of which is drawn up by the Department, after consultation with the reporter. The report is posted to the Department on the evening of the fair; is scrutinised in the Department with a view to publication; and copies are issued to the Press. The only live stock for which prices are furnished are cattle, sheep, and pigs.

The report, which opens with a short account of the chief characteristics of the fair, shows the prices obtained for each description of stock, classified according to age and quality, and gives estimates of the number of each class offered for sale and sold. During the year 1911 there were 773 reports received of fairs held at 178 different towns.

Returns of prices of fat cattle and fat sheep are also obtained for Duhlin from the Corporation Market and from Mr. Gavin Low, Auctioneer, and for Belfast from the Corporation Market and from Messrs. Robsons, Limited, Auctioneers. These Returns show the actual weight of the cattle and sheep sold, and the prices paid. From these data the prices per cwt. live and dead weight are calculated. As these Returns, based on live weight, have been systematically obtained since 1887, they afford a valuable record of the fluctuations in the prices of fat stock and of beef and mutton during the past twenty-five years.

Reports on the prices of the chief crops and of other agricultural produce are furnished weekly to the Department by the Officers of Customs and Excise at the following towns:—Duhlin, Belfast, Londonderry, Cork, Waterford, Limerick, Galway, Sligo. Reports also of the prices of grass seed and flax are furnished by the Officers of Customs and Excise at Ballymena, Cookstown, Newry, and Cootehill during several months of the year. These officers, with the sanction of the Board of Customs and Excise, furnish particulars of actual transactions at the several towns, and indicate in their reports not only the average price obtained for average qualities, but also the current market prices for superior and inferior qualities of the various articles of produce.

In this series of Reports the prices of the following are recorded:—Wheat, Oats, Barley, Potatoes, Hay, Grass Seeds, Flax, Cattle, Sheep, Pigs, Beef, Mutton, Pork, Butter, Eggs, and Wool. The possibility of obtaining reliable returns of the prices and supplies of Irish Horses sold in Ireland is at present under consideration, and it is hoped to extend and improve the system of Returns of Prices of Irish Agricultural Produce, so as to include not only prices of a larger number of commodities, amongst them being Turnips and Mangels, but also prices

obtained at a larger number of centres than hitherto. Whatever changes, however, are made in the present system, care will be taken to preserve that statistical continuity which is so desirable, especially in a system of Prices Statistics.

The quarterly and annual averages shown in the statistical tables submitted in this Report are based on the data furnished throughout the year by Customs and Excise Officers, Fair Reporters, Auctioneers, and Market authorities. In the detailed tables the "highest" and "lowest" prices are also given. Prior to 1905, "highest" and "lowest" prices are, as stated in previous Reports, the average of the highest monthly prices and the average of the lowest monthly prices. As, however, "average highest" and "average lowest" do not indicate adequately the actual range of prices, the individual highest and lowest prices have been shown since 1905.

In determining the average prices allowance is made for the number or quantity of each class of live stock or agricultural produce which is offered for sale. The average obtained is thus not the arithmetical mean between the highest and lowest prices, but represents an average based on the value of the total sales divided by the number or quantity sold. This method gives the true average price, while the highest and lowest prices indicate the range of prices. The Returns furnished are carefully compared with independent commercial records and with the official prices, as returned from the markets of Great Britain. A study of the several records of prices brings out the fact that while there are points of variation and difference, due largely to local and temporary causes, there is substantial agreement as to the general level and changes in prices. It should be stated that the prices of agricultural products given in this Report relate only to Irish stock and produce.

It may be well also to recall that the work of collecting and compiling comparative prices of agricultural produce is of very considerable difficulty, and allowance must be made for this fact in judging returns and in drawing deductions therefrom. The difficulty is due mainly to local fluctuations in prices, to various standards of quality among articles of produce, to the method of buying and selling live stock by estimate at provincial fairs, and not by ascertained weight as in the Metropolitan Markets, and to the fact that full information as to the total number of live stock sold throughout the year is not available. At the best, it is only possible to obtain representative prices. A record of all markets and fairs is out of the question. On the other hand, it should be remembered that at the present day markets are in much closer sympathy than at earlier times, and changes in the level of prices quickly become general. Where, however, data of prices of produce have been carefully collected at a number of representative centres during the year, and where, as far as possible, continuity of system is maintained in carrying on a record, the

changes shown may be regarded as typical, and afford a much more adequate view of the general movement of prices than might be supposed. Similarly, where not only the true average, but also the highest and lowest prices are shown, a good indication of the range of prices is thereby given.

Attention has been directed in preceding reports to the question of the great changes in agricultural **IMPORTANCE OF** prices which have taken place during the **PRICE RECORDS.** past sixty years. Agricultural prices have risen high and fallen low, and in some commodities the rise and the fall have been less than in others. It is, therefore, of importance to grasp the broad movement of prices, and also the relative changes which have taken place in the case of the principal commodities. Furthermore, prices have become much less local in character. To a large extent they are international, and are subject to influences of supply and demand beyond the control of the home producer. Prices thus furnish the best index of the nature and state of the competition with which the farmer of to-day has to reckon, and prices are the final test which he has to apply in determining what he should produce. Again, modern markets have become highly organised and differentiated, and while international competition has lowered and levelled prices, standardisation and differentiation of quality have made possible a wide range of prices, and have rewarded the producer who has regard to quality and "finish." And as the difference between the prices in the different qualities of an article bear often little relation to the respective costs of production, this question of quality and finish deserves the greatest attention from farmers. Formerly prices at local and central markets varied widely, but each year this tendency becomes less as information improves. To-day the cause of the wide range in prices is the attention paid to the production of quality, to careful grading and packing and to the time at which articles are placed on the market. Also, with the advent of cold storage and of foreign and colonial supplies, certain classes of produce have been, to a large extent, displaced, such as the winter salt butter trade, and the farmer has to consider closely how he can adapt his production so as to obtain the full advantage of the best prices in the home market. Thus the question of marketing in the proper way and at the proper time is now as important for the farmer as attention to improved methods of growing crops and breeding and feeding of live stock.

In order to obtain a correct idea of the relative importance to the Irish farming community of a change in **RELATIVE CHANGES** price of any class of live stock or commodities **IN PRICES.** dealt with in this Report, it would be necessary to have information as to the numbers or quantities sold by the Irish farming community taken as a whole, sales to Irish farmers being excluded. No such information is at present published, and such sales are most difficult even to estimate. A rough idea, however, can be obtained as to the effect of changes in prices of Cattle, Sheep, Pigs, Wheat, Oats, Barley, Potatoes, Hay, and Flax from the following figures,

which are taken from the Department's General Abstracts of Tillage and Live Stock (Cd. 5886/1911) and preliminary Produce Leaflets, and which shows the numbers of Cattle, Sheep, and Swine in Ireland on the 1st June, 1911, and the total production of Wheat, Oats, &c., in Ireland in 1911:—

Cattle,	4,711,720 head
Sheep,	3,907,436 "
Pigs,	1,415,119 "
Wheat,	887,188 cwts.
Oats,	16,916,416 "
Barley,	3,042,238 "
Potatoes,	3,694,856 tons
Hay,	4,474,567 "
Flax,	1,798,481 stones (14lbs.)

Deductions as to the relative importance of changes in prices must be drawn with great caution from these figures. For instance, a change in the price of Oats, Potatoes, or Hay will not have the importance to Irish farmers that these figures would suggest, as the greater part of the Irish production of these commodities is fed to live stock in Ireland. A rise in the prices of these would help the tillage farmer who has a surplus for sale, but would add to the difficulties of raisers of live stock who have to buy these commodities.

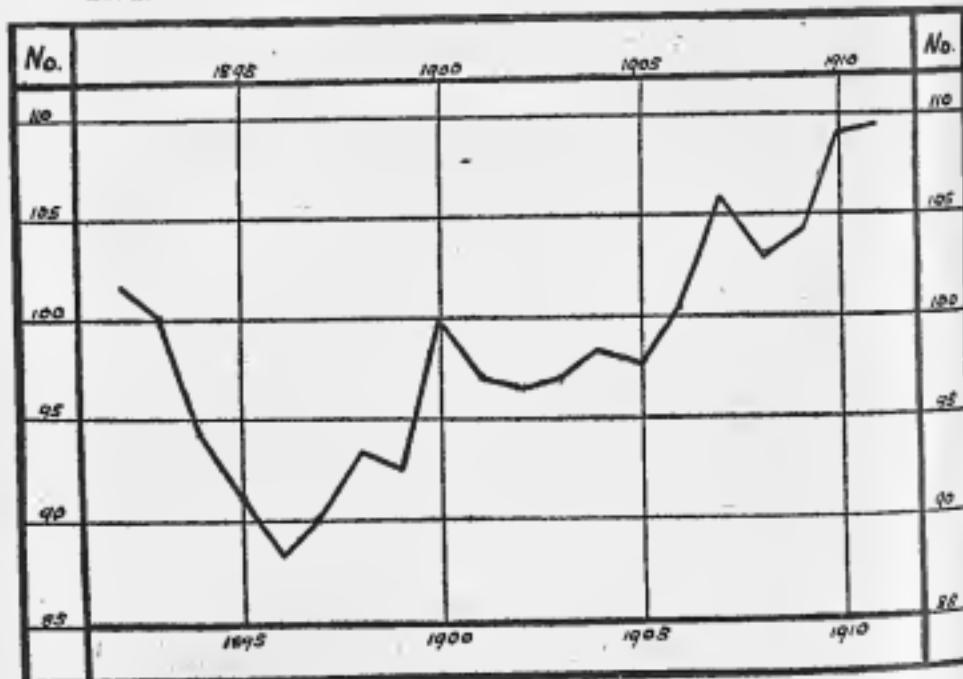

The main changes which have taken place respectively in the prices of crops, live stock, and other agricultural produce during the previous sixty years were traced in the Report for 1906-1907.

In the present report the only prices referred to are those recorded during the twenty years 1892-GENERAL POSITION OF 1911, inclusive. Later in this report the PRICES, 1911. movements of the particular commodities will be noticed in detail, but here it is well to get a quick general idea of the state of prices in 1911 as compared with the previous nineteen years. The prices obtained in 1911 were not exceeded in any of the previous nineteen years in the case of Eggs; Store Cattle, one year old, two to three years old, and Springers. Prices were only exceeded in one year in the case of Potatoes (1907), and Flax (1910); in two years for Oats, Store Cattle, three years old, Beef, Pork, and Butter; in three years for Wheat; in four years for Barley and Wool; in five years for Hay; in seven (out of seventeen) years for Grass Seeds; and in nine years for Store Lambs. The prices, however, for Store Sheep and Mutton were extremely unsatisfactory. In none of the previous nineteen years was the price of Store Sheep, two years old and over, so low, and the price of Store Sheep, one to two years old, was only lower in four years (1892, 1893, 1896, and 1902), and of mutton only lower in seven years. The general range of agricultural prices, however, was very satisfactory in the year 1911.

It must, however, be borne in mind that although the prices of agricultural produce have increased considerably during the last twenty years, the farmers' expenses have also increased greatly. The value of gold has been

decreasing, or, to put it otherwise, the general range of prices, agricultural and other than agricultural, has been increasing since the year 1896. A change in the purchasing power of money is measured by several systems of "Index Numbers." The system adopted by the Board of Trade takes account of the prices of forty-five principal commodities, including Food Stuffs (Corn, Potatoes, Meat, Sugar, &c.), Coal and Metals, Textile Raw Materials, and other commodities, e.g., Timber, Bricks, &c. Each of the commodities is "weighted" according to its importance; the prices for each year multiplied by the weights are added together, and the result reduced to a percentage of the total for the year 1900. The following diagram has been constructed from the "Index Numbers" adopted by the Board of Trade, and shows at a glance the change in the general range of prices of commodities, agricultural and other than agricultural, during the last twenty years.

Diagram showing the "Index Numbers" of Wholesale Prices for the twenty years 1892-1911 as calculated by the Board of Trade—

The "Index Numbers" for these years were—

1892—101.8	1899—92.3	1906—100.4
1893—100.0	1900—100.0	1907—105.7
1894—94.2	1901—96.9	1908—102.8
1895—91.0	1902—96.5	1909—104.0
1896—88.2	1903—96.9	1910—108.7
1897—90.1	1904—98.3	1911—109.3
1898—93.2	1905—97.6	

The following two tables show the average prices of (1) Farm Crops and (2) Live Stock, Meat, &c., for the year 1911 compared with 1910, and the average prices for the two decades, 1890-1899 and 1900-1909:—

* Pardon's figures for years 1890-1892.

These tables show that taking everything into account, it may be said that the level of the prices of Irish agricultural products in 1911 was very favourable, as compared with recent years, but, as stated above, the purchasing power of money has fallen considerably since 1896. Comparing the prices recorded for 1911 with those for 1910, it is found that some have increased, while others have decreased. There was a rise in the prices of Wheat,

Oats, Barley, Potatoes ; Store Cattle, one year old ; Store Cattle, two years old ; Springers ; Lambs ; Butter and Eggs ; but a fall in the prices of Hay ; Grass Seeds ; Flax ; Store Cattle, three years old ; Store Sheep, one year old ; Store Sheep, two years old ; Beef ; Mutton ; Pork, and Wool. A more detailed statement, with comparisons of the movement of prices of Crops, Stock, and Dairy Produce during the year 1911 is made in the following paragraphs.

I. CROPS.

Prices of Sales of the Irish Wheat Crop harvested in 1910 were recorded up to March 4th, 1911, the average price from the 1st January, 1911, to the close of the sales being $7/0\frac{1}{2}$ per cwt., as compared with $9/1\frac{1}{2}$ for the corresponding period of 1910. The area sown in 1911 was only 45,056 acres as against 47,631 in 1910, and though the average yield was higher (19.7 ewts. per statute acre as against 19.3 ewts. in 1910), the total produce showed a decrease from 919,384 ewts. in 1910 to 887,188 ewts. in 1911. The quality, however, of the 1911 grain was very superior. Sales of the new grain commenced in the third week of August, the prices realised being considerably higher than in 1910. The average price for the quarter ended 30th September, 1911, was $7/5\frac{1}{2}$, as against $7/1\frac{1}{2}$ in 1910. During the quarter ended 31st December, prices showed a marked increase, the average being $7/9\frac{1}{2}$ in 1911, as compared with $6/9\frac{1}{2}$ in the same quarter of 1910. The yearly average price for 1911 amounted to $7/5\frac{1}{2}$, as against $7/0\frac{1}{2}$ in 1910, and was considerably above the average during the past twenty years, and was never exceeded in any of these years except 1907, 1908, and 1909.

Prices of Irish Oats harvested in 1910 were recorded continuously up to the second week in August, 1911, after which the new crop began to be marketed. The area sown with Oats and the average yield per acre in 1911 was smaller than in 1910. The area decreased from 1,073,690 acres in 1910 to 1,040,185 in 1911, the yield from 17.5 ewts. per acre to 16.3 ewts., and the total produce from 18,791,494 ewts. to 16,916,416 ewts. The crop, however, was excellent in colour and condition, and realised very satisfactory prices. The average price of Oats (White and Black) for the year was $6/2\frac{1}{2}$ per cwt., and was never exceeded in any year since 1893.

In the quarter ended 31st March, 1911, the average price of White Oats was $5/10\frac{1}{2}$, as against $6/2\frac{1}{2}$ in the corresponding quarter of 1910. Prices, however, rose, and in the quarter ended 30th June were higher than in the corresponding quarter of 1910, being $6/7$, as against $6/6\frac{1}{2}$. The prices in the third and fourth quarters were considerably higher than in the corresponding

periods of 1910, being $6/4\frac{1}{4}$, as against $5/10\frac{1}{4}$ in the third quarter and $7/0\frac{1}{2}$ in the fourth quarter, as compared with $5/6\frac{1}{2}$ for 1910. Taking the average for the year 1911, the price of White Oats amounts to $6/6$, as compared with a like average of $5/10$ in 1910, and of $6/2$ for the ten yearly period, 1900-1909.

The prices of black oats showed a similar variation as compared with the corresponding prices of the **BLACK OATS**. previous year. For the quarter ended 31st March, the average price was $5/7\frac{1}{2}$ per cwt., as against $6/0\frac{1}{2}$ in 1910; for the quarter ended 30th June, 1911, the price was $6/4$, as against $6/3$ in 1910. For the quarter ended the 30th September, 1911, the price was $5/10\frac{1}{4}$, as against $5/0\frac{1}{2}$ in 1910; and for the December quarter, $6/2\frac{1}{4}$, as against $5/0\frac{1}{2}$ in 1910. The average for the year 1911 was $5/11\frac{1}{4}$, as compared with $5/2\frac{1}{4}$ in 1910, and $5/5\frac{1}{4}$ for the ten yearly period, 1900-1909.

The area under barley in Ireland in 1911 was 158,180 acres, as against 168,008 acres in 1910. The **BARLEY**. average yield per acre, however, was considerably higher—being 19.2 cwts. in 1911, as compared with 17.5 cwts. in 1910; and accordingly, though the area under the crop was smaller, the total produce showed a satisfactory increase, being 3,042,238 cwts. in 1911, as against 2,934,104 cwts. in 1910. The quality of the crop, also, was excellent. Sales opened in the fourth week of August, and prices realised were satisfactory. The average price for the year was $7/1\frac{1}{4}$ per cwt., and was only exceeded in four of the previous nineteen years—in 1902, 1904, 1908 and 1909. The average price for the quarter ended 30th September, was $7/1\frac{1}{2}$, as against $6/11\frac{1}{2}$ in the same quarter of 1910; and in the last quarter $7/5\frac{1}{2}$, as compared with $6/11$ for the last quarter of 1910.

The acreage under potatoes in Ireland decreased from 592,985 acres in 1910 to 591,259 acres in 1911; there **POTATOES**. was, however, a substantial increase in the average yield per acre, which increased from 4.8 tons in 1910 to 6.2 tons in 1911, with the result that the total produce of sound tubers increased from 2,870,827 tons in 1910 to 3,694,856 tons in 1911. The quality of the tubers also was excellent. The average price recorded for 1911 was $3/6$ per cwt., and only once exceeded in the previous nineteen years—in 1907, when the price was $3/11\frac{1}{2}$ per cwt. The prices obtained in the first, second, third and fourth quarters of the year were $3/5\frac{1}{4}$, $4/2\frac{1}{2}$, $3/5$ and $2/10\frac{1}{4}$ respectively; as compared with $3/0\frac{1}{2}$, $3/3$, $3/5\frac{1}{4}$ and $3/3\frac{1}{4}$ in the corresponding quarters of 1910. Accordingly, the average price for each of the first two quarters was higher, but for each of the last two quarters was lower, than in 1910.

The acreage under hay in Ireland in 1911 showed a considerable increase as compared with 1910, but the average yield was very small, in consequence of the extremely dry season, and

HAY. the total produce of first year's hay, second and third year's hay and permanent meadow decreased from 5,778,244 tons in 1910, to 4,474,567 tons in 1911. The quality of the crop, however, was excellent. The price recorded for 1911, though lower than in 1910 and 1909, was only exceeded in five of the nineteen years, 1892-1910. The prices per cwt. obtained for clover hay in the first, second, third and fourth quarters of 1911 were $3/5\frac{1}{2}$, $3/3\frac{1}{2}$, $3/1\frac{1}{2}$ and $3/11$ respectively; as compared with $4/9\frac{1}{2}$, $4/7$, $3/4\frac{1}{2}$ and $3/7$ in 1910. And for meadow hay, $2/4\frac{1}{2}$, $2/1\frac{1}{2}$, $2/8$ and $3/3$; as compared with $3/8\frac{1}{2}$, $3/5\frac{1}{2}$, $2/6$ and $2/5\frac{1}{2}$ in 1910. Accordingly, prices in the last quarter for clover hay and in the last two quarters for meadow hay were better than in 1910.

The average annual prices of grass seeds, which increased in 1907, 1908 and 1909, decreased in 1910, and showed a further decrease in 1911.

GRASS SEEDS. The average price in 1911 was $12/2\frac{1}{4}$ per cwt., as compared with $13/5\frac{1}{2}$ in 1910, and $11/11$ for the average of the ten years 1900-1909. The prices of both perennial and Italian rye-grass were lower in each quarter of 1911 than in the corresponding quarter of 1910. For the quarter ended 31st March, the price of perennial was in 1911 $13/11\frac{3}{4}$ per cwt., as against $14/6\frac{1}{4}$ in 1910; for the quarter ended 30th September, the price of perennial averaged $12/5\frac{1}{2}$ in 1911, as against $13/6\frac{1}{2}$ in 1910, and the price of Italian $16/-$, as against $17/7\frac{1}{4}$ in 1910; for the quarter ended 31st December the average price of perennial was $12/2\frac{1}{2}$, as against $12/7\frac{1}{2}$ in 1910; and of Italian, $15/8$, as against $17/-$ in 1910.

The area under flax in Ireland showed a substantial increase in 1911—being 66,618 acres, as compared with 45,974 acres in 1910. The average yield of scutched fibre per statute acre,

FLAX. however, was only 270 stones, as compared with 309 stones in 1910. The total produce of the scutched fibre increased from 1,420,122 stones in 1910, to 1,798,481 stones in 1911. The prices realised in 1911 were very satisfactory, the average for the year being $8/6\frac{1}{4}$ per 14 lbs. This price, though lower than the average price for 1910, which was $8/8\frac{1}{2}$, was higher than the average prices realised in any of the eighteen years, 1892-1909. The price for the quarter ended 31st March was $10/2\frac{1}{4}$, as compared with $8/0\frac{1}{2}$ in 1910; for the quarter ended 30th September, the price was $8/3\frac{1}{2}$, as compared with $7/9\frac{1}{2}$ in 1910; and in the last quarter of the year the price was $8/1$, as compared with $9/0\frac{1}{2}$ in 1910.

II. LIVE STOCK AND OTHER PRODUCE.

The prices of fat cattle were very satisfactory in 1911, and the numbers exported from Ireland increased
FAT CATTLE. from 260,260 in 1910, to 269,966 in 1911.

The average price per cwt., live weight, of fat cattle sold in the Dublin Market in 1911 was 33/3, and was only exceeded in two of the previous fourteen years—in 1910, when it reached 34/4, and in 1902, when it was 33/6. The average prices in the first, second, third and fourth quarters of 1911 were 33/4, 35/5, 32/7 and 32/7, respectively; as compared with 33/8, 38/3, 35/5 and 32/1 for the corresponding quarters of 1910.

Prices of store cattle were exceptionally favourable in 1911, but the numbers exported from Ireland
STORE CATTLE. fell from 543,788 in 1910, to 390,294 in 1911.

The prices of each of the four classes recorded one year old, two years old, three years old, and springers, advanced in price each year from 1906 to 1910, when they were higher than in any of the previous eighteen years. Each of these classes, with the exception of three year olds, showed a further advance in 1911. The prices were—for one year old, £8 8s. 8d., as against £8 0s. 1d., in 1910; for two years old, £11 1s. 4d., as against £10 17s. 8d., in 1910; for three years old, £13 0s. 4d., as against £13 3s. 5d., in 1910; and for springers, £15 4s. 2d., as against £15 3s. 0d., in 1910. The prices for each of the four classes was higher in the first two, and lower in the last two, quarters of 1911 than in the corresponding quarters of 1910.

The average price per cwt. of fat sheep sold in the Dublin Market in 1911 was 34/4, as compared
FAT SHEEP. with 36/11 in 1910. The average for last

year was lower than in any of the previous fourteen years, with the exception of 1909, 1902, 1899 and 1898. The number of fat sheep exported from Ireland fell from 329,381 in 1910, to 296,799 in 1911.

The price for the quarter ended 31st March was 37/6, as against 39/6 in 1910; for the quarter ended 30th June, 36/8, against 41/10 in 1910; in the quarter ended 30th September, 31/7 as against 33/6 in 1910; and in the last quarter, 30/6, as against 32/1 in 1910.

The prices of store sheep were most unsatisfactory in 1911. The average price of two year olds and
STORE SHEEP. over was only 33/- per head, and was lower than the average price for any of the previous nineteen years.

Store sheep, one to two years, fetched, on an average, 32/5 per head, which was lower than the price in any of the previous nineteen years, except those recorded for 1902, 1896, 1893 and 1892. The average price obtained for lambs in 1911 was not so unsatisfactory, being 24/7 per head, as compared with 24/2 in 1910, and 22/9 in 1909. The average

prices for the first, second, third and fourth quarters of 1911 were, respectively, for store sheep, two years old and upwards, 37/9, 32/3, 32/4 and 34/4, as compared with 45/2, 44/5, 30/10 and 38/3 in 1910; for store sheep, one to two years old, 33/8, 34/8, 29/- and 31/10, as compared with 39/6, 35/9, 30/4 and 36/4 in 1910; and for lambs, 31/-, 25/7, 22/11 and 24/1, as compared with 30/8, 26/2, 23/1 and 26/- in 1910.

The number of pigs in Ireland in June, 1911, was 1,415,119, as compared with 1,200,005 in June, 1910, **PORK.** and was higher than the number in any year since June, 1890, when it stood at 1,570,366. The numbers killed or houghed dead by Irish bacon curers increased from 1,143,025 in 1910, to 1,253,197 in 1911; and the numbers exported from Ireland increased from 324,071 in 1910, to 342,340 in 1911. The increase in supplies was accompanied by a fall in prices—the average price obtained for fresh pork in Ireland in 1911 being 51/- per cwt., as compared with 60/3 in 1910, and 55/5 in 1909. The average price for 1911, however, was not exceeded in any of the seventeen years, 1892 to 1908. The prices per cwt. for the first, second, third and fourth quarters of 1911 were 55/3, 54/3, 52/2 and 44/8, respectively, as compared with 60/2, 61/3, 64/5 and 55/11 in 1910. Accordingly, the price has fallen each quarter from the record price of 64/5 in the third quarter of 1910, to 44/8 in the last quarter of 1911.

The prices obtained for Irish butter in 1911 were very satisfactory, the average for all kinds for the **BUTTER.** year being 106/8 per cwt., a price which was exceeded in only two of the previous nineteen years, in 1908 and 1892. The returns of prices of creamery butter showed an average of 112/11 per cwt., as compared with 106/9 in 1910. Factory butter showed an average of 95/5, as compared with 94/6 in 1910, and farmers' butter an average of 95/-, as compared with 94/- in 1910. Unfortunately, while the year was one of the best in recent times as regards prices, the output of butter showed a falling off. The average for creamery in the quarter ended 31st March was 110/1 per cwt., as against 122/5 in 1910; the average for factory, 91/2, as against 106/4 in 1910; and the average for farmers' butter, 93/6, as against 112/1 in 1910. During the second quarter, ended 30th June, the average price for creamery was 101/10, as against 104/10 in 1910; the price for factory, 86/10, as against 95/8 in 1910; and the price for farmers' butter, 86/10, as against 94/- in 1910. During the third quarter, ended 30th September, the price of creamery was 115/11, as against 105/1 in 1910; the price of factory, 96/5, as against 92/3; and the price of farmers' butter, 95/3, as against 90/11. In the fourth quarter, ended 31st December, the average price of creamery butter was returned at 126/3, as compared with 108/4 in 1910; the average of factory butter at 109/3, as compared with 93/6; and the average of farmers' at 108/9, as compared with 94/1 in 1910.

Irish eggs fetched most satisfactory prices in 1911—the average price for the year being 9/0½ per 120, the eggs. highest annual average recorded in this series of returns. For the quarter ended 31st March, the average per 120 was 9/3½, as against 9/1½ in 1910; the average for the quarter ended 30th June was 7/4, as against 6/11½; for the quarter ended 30th September the average price was 9/- in 1911, as against 8/6½ in 1910. In the last quarter, ended 31st December, the average price in 1911 rose to 14/2, as against 13/7 per 120 in 1910.

Wool prices in 1911 were again satisfactory, the average for the year being 10½d. per lb., an average which was exceeded in only four of the previous nineteen years, in 1910, 1907, 1906 and 1905. The average price for the first quarter was 10½d., as against 10½d. in 1910; in the second quarter, 10½d., as against 10½d. in 1910; in the third quarter, 10½d. as against 10½d. in 1910; and in the last quarter, 10½d., as against 11½d. in the corresponding quarter of 1910.

Attention is directed to the various diagrams presented at the end of this Report, as these show in a simple and clear form the bold changes which have taken place in the prices of the several commodities during the past twenty years. Diagrams are also included, showing the weekly average prices of butter and eggs, as the great variation in the summer and winter value of these articles is a matter of very practical interest.

I have the honour to be,
Sir,
Your obedient Servant,

THOMAS BUTLER,
*Superintendent of Statistics,
and Intelligence Branch.*

DETAILED TABLES.

SECTION III.--MEAT, PROVISIONS, &c.

TABLES XVII.-XXI.

TABLE XVII.—BEEF AND MUTTON.

Dublin Markets.—Average Prices per 112 lbs. (Dead Weight).

(See Diagram XIV.)

NOTE.—The prices of Beef and Mutton in this Table have been compiled from reported prices per 112 lbs., live weight of Fat Cattle and Fat Sheep sold in the Dublin Market; the average prices per 112 lbs., dead weight, being calculated therefrom in the ratio of 4 to 7.

Year.	Beef.	Mutton.	Year.
	£ s. d.	£ s. d.	
1892, ..	2 12 4½	2 18 1	1892
